Art Unit: 1761

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 23-27, 29, 36-46, drawn to a brown sugar substitute, classified in class 426, subclass 99.
- II. Claim 28, drawn to another brown sugar substitute, classified in class 426, subclass 103.
- III. Claims 34-35, drawn to baked cookies, classified in class 426, subclass 549.
- IV. Claims 47-49, drawn to another brown sugar substitute, classified in class 426, subclass 555.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II & III & IV are unrelated and independent. The substitute in each group is different from the other. The substitute in Invention I is particles which are coated with fat and molasses. This is different from the substitute of Invention II which is a solution not containing fat. Both of these substitutes are different from the substitute of Invention IV which is uncoated and contains specific proportion of ingredients. The substitutes are entirely different and unrelated to the baked cookies of Invention III.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, IV or vice versa, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1761

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
